

ICTP-ICO-MCTP College on Optics and Energy

28 April – 9 May 2014. MCTP (Tuxtla Gutiérrez, Chiapas, Mexico)

The College is intended to provide researchers from developing nations, and in particular Latin America and the Caribbean, with a scientific understanding of photovoltaic systems, recent scientific achievements in nanotechnology and plasmonics for the enhancement of the efficiency of solar cells and global tendencies towards efficient energy consumption and the implementation of smart grids.

The workshop is open to researchers and students from all countries which are members of the United Nations, UNESCO, or IAEA. Due to budget limitations, every effort should be made by candidates to secure either total or partial support for their expenses. However, funds are available exclusively for a limited number of participants who are nationals of, and working in, countries from Latin America and the Caribbean. Participants are required to take part in all aspects of this activity for its entire duration. There is no registration fee.

The application form can be accessed at the activity website <http://agenda.ictp.it/smr.php?2620>
